PROFESSIONAL SUMMARY

Building Reliable Digital Solutions with Next.js & Modern Web Technologies.

Software developer focused on building practical, reliable, and scalable digital solutions. I build modern full-stack web applications with Next.js and TypeScript, supported by strong database experience with PostgreSQL and MySQL.

Availability: Open to opportunities (Full-Stack Development)

CAREER HIGHLIGHTS

- 2+ years building production web applications
- 10+ production applications delivered
- 100% commitment to code quality and reliability

CORE SKILLS

Backend: Node.js (Primary) REST API (Primary) API Architecture (Strong) Backend Architecture (Strong) Authentication (Strong) Authorization (Strong)

Frontend: Next.js (Primary) React (Primary) TypeScript (Strong) Responsive Web Design (Strong) UI/UX Implementation (Working)

Database: PostgreSQL (Primary) MySQL (Primary) Database Design (Primary) Relational Database (Primary) Query Optimization (Strong)

Development: Git (Primary) API Integration (Strong) System Architecture (Strong) Docker (Working)

Levels: Primary = daily expertise · Strong = solid proficiency · Working = applied familiarity.

TECHNICAL STACK

Next.js, React, Node.js, Express.js, TypeScript, JavaScript, PostgreSQL, MySQL, Tailwind CSS, REST API, Supabase, Zustand, Zod, Recharts, Vite, Git, Docker

PROJECTS (1) — POS KASIR

Production-ready Point of Sale application

A full-stack POS application designed for real business operations, featuring cashier workflow, barcode scanning, dynamic RBAC, profit tracking, customer profit sharing, and PWA support with push notifications.

Key Features

- Full cashier workflow with barcode scanning (USB & manual)
- Hold/resume transactions and multi-method checkout
- Dynamic RBAC permission system stored in the database
- Price snapshots at transaction time for accurate profit history
- Customer profit sharing (bagi hasil) calculations
- PWA with web push notifications and Telegram bot fallback
- Automatic inventory tracking, cash management, and session reconciliation
- Comprehensive reporting with CSV export and full audit trail

Technologies: React, Vite, Tailwind CSS, Node.js, Express.js, Supabase PostgreSQL, Zustand, Zod, Recharts

Live Demo: <https://pos-app-alpha.vercel.app/>

Result: Delivered a production-ready POS system that handles concurrent transactions safely, provides real-time business insights, and installs as a native-like app on mobile devices.

PROJECTS (2) — SIM KLINIK

Sistem Informasi Manajemen Klinik

A web-based clinic information management system that unifies patient registration, queue management, medical records, pharmacy, and financial billing into a single, integrated interface with role-based access.

Key Features

- Integrated clinical workflow: registration, queue, medical records, pharmacy, to billing
- Role-based access control (admin, doctor, nurse, pharmacist, cashier, laboratory)
- Patient registration and appointment scheduling
- Electronic medical records (Rekam Medis) management
- Pharmacy and medication management
- Billing and financial transactions
- Audit trail for every action; clean, calm, responsive interface

Technologies: Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, REST API

Live Demo: <https://klinik-rho.vercel.app/>

Result: Delivered a production-ready clinic management system that replaces disconnected manual processes with a fast, integrated and auditable workflow for the entire clinic.

PROJECTS (3) — RMS RESTOMANAGER

Sistem Manajemen Restoran

A web-based restaurant management system that centralizes menu management, order handling, and table-based operations into a single dashboard for restaurant staff (RMS v2).

Key Features

- Menu and menu category management
- Order management with table tracking
- Restaurant operations dashboard
- Secure staff login with role-based access
- Interactive live demo with admin credentials

Technologies: Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, REST API

Live Demo: <https://restaurant-ten-lemon.vercel.app/>

Result: Delivered a restaurant management system with an interactive live demo, letting owners explore the full workflow with a simple admin login.

EXPERIENCE

Full-Stack Developer — Independent / Freelance

Present

- Building scalable full-stack applications with Next.js
- Developing modern web applications with Next.js
- Designing and implementing database architectures
- Creating RESTful APIs and integration services
- Focusing on code quality and system reliability

Technologies: Next.js, Node.js, PostgreSQL, MySQL, TypeScript

EDUCATION

1: D3-Manajemen Informatika

LANGUAGES

- **Bahasa Indonesia** — Native
- **English** — Professional

SERVICES OFFERED

- **Web Application** — Modern responsive web applications using Next.js and React.
- **Backend API** — Fast and maintainable backend systems using Node.js.
- **Full-Stack Application** — End-to-end applications from frontend to backend and database.
- **Business Systems** — Custom applications for operational and business processes.
- **Database Systems** — Database design and implementation using PostgreSQL and MySQL.

ENGINEERING PHILOSOPHY

- **Simplicity:** Build solutions that are easy to understand and maintain.
- **Reliability:** Focus on predictable, stable, and dependable systems.
- **Scalability:** Design systems that can grow with business requirements.
- **User Focus:** Technology should solve real problems, not create unnecessary complexity.
